About conference

Organizing Committee cordially invites participants from all over the world to attend 22nd World International Conference on Environmental Chemistry and Technology, scheduled during September 08-09, 2021 at Berlin, Germany mainly focused on the theme “Environmental Chemistry and Engineering: Advancing Toward a Safer and Sustainable Future”.

Environmental Chemistry conference aims to bring together the prominent researchers academic scientists, and research scholars to exchange and share their experiences on all aspects of Green Chemistry. It is also an interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent advances, trends, and concerns as well as practical challenges and solutions adopted in the fields of Environmental Chemistry.

22nd World International Conference on Environmental Chemistry and engineering will focus on many interesting scientific sessions and covers all frontier topics in Environmental Chemistry which includes Principles in Environmental Chemistry, Green Catalysis, Green Materials, Green Synthesis and Designing, Greener Bioprocesses, Green Chemistry applications in industries, Green energy, Waste Valorization Techniques, Environmental Chemistry aspects, Environmental Economy, Sustainable flow chemistry, Green Engineering & Manufacturing, Green Polymers, Green Chemistry applications in different industries, Green Catalyst and Reagents and many more. In the coming years Environmental Chemistry is known as a specific field of science and technology. The focus is mainly on minimizing the hazards and maximizing the efficiency of any chemical choice. The conference also includes Keynote speeches by prominent personalities from around the globe in addition to both oral and poster presentations.

On behalf of Environmental Chemistry 2021, Organizing Committee is glad to invite contributions from the enthusiastic academicians, scientists to organize International Symposia/Workshops that are both empirical and conceptual in exploring new dimensions of green chemistry challenges towards achieving the solutions.

Why to attend ?

- Meet experts and influencers face to face

- Conferences provide a great opportunity to network where most people can help each other uncover ideas and spark inspiration
- Encounter new vendors and suppliers
- Attending a conference allows you to grow and challenge yourself
- Position Your Company as a Champion
